

CARBON MICROFIBER CLOTH

THE MICROFIBER CLOTH'S PROPERTIES - THE STRENGTH OF CARBON FIBER

Item No.: L1911-14 Carbon Microfiber Cloth 15x20 cm. or 40x50 cm. - blue/red stitching

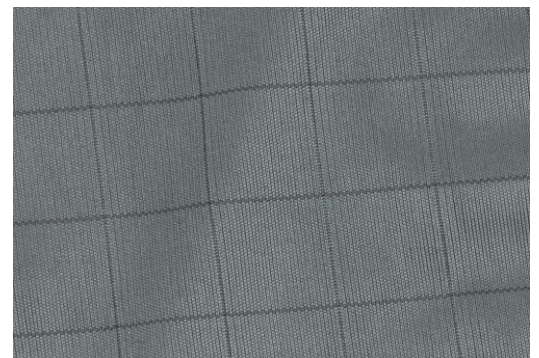

CONTAINS REINFORCING CARBON

LONGER DURABILITY

BETTER ABSORPTION

STRONGER WIPING PERFORMANCE

500 WASHES PER CLOTH

APPLICATION:

The Carbon Microfiber Cloth is the extra-strong, longer-lasting, more absorbent, and antistatic cloth for use everywhere. The cloth has all the traditional properties of a microfiber cloth but contains carbon, which is 200 times stronger than steel and 5 times lighter than aluminum, making the cloth incredibly strong and extremely flexible. The innovative texture of the Carbon Microfiber Cloth provides excellent wiping results on all surfaces but is particularly effective on windows, glass, mirrors, chrome, car paint, LED screens, stainless steel, and many other surfaces, leaving them completely streak-free.

INSTRUCTIONS FOR USE:

Use the cloth either wet or dry.

When wiping with a dry cloth, an antistatic and antibacterial effect is achieved.

Wash at temperatures up to 60 degrees.
